Clone Stamp Tool

» The clone stamp tool is used to _____ or _____ parts of an image.

» When using the clone stamp tool you have two options:

> .

> .

Clone Stamp Tool ›

» The clone stamp tool is used to remove/cover up or replicate unwanted parts of an image, by using another part of the image.

> Goal: To make the picture look as if the portion covered never existed or the portion replicated always existed.

Before   After

Clone Stamp Tool ›

» In order to use the clone stamp tool you must:
> Open the image you want to edit in Photoshop.

> Select the _____.

> Holding down the _____ key, click once on a portion of the image that is directly above/below/next to the portion to be removed or replicated.
  + this will allow you to cover that portion to look like the rest of the background.

> Continue selecting small portions of the background by holding down the ALT key and clicking, then cloning out part of the image. This process can take time and requires careful attention to detail.
